

Hint for a safe ride

coming with long vehicles is such a challenge indeed, but is possible, check this hints :)

We are on the top of a valley that embraces Cumiana's center town, for this reason is suggestionable to come up from one side and go down from the other in order to have always the mountain side by yours

way up: coming from Giaveno [hint point for gorceries] towards Cumiana using Colletta road [SP193] on the top turn right and keep climbing

or arriving from Cumiana same road Colletta that connect to Giaveno, turn just passed the Colletta's church on the right and reverse

you will pass some small hamlets: "Fiola", "Villaggio del sole", "Morelli", "Moncalarda", then some open field (don't give up now.. 350m and you are arrived, come on!) and finally: "Verna" (cemetery on the right and then, on your left, you will pass a tiny old alpine church) now the road starts going downhill again, after a short while you will see flags on your left side... and maybe some tents !!

YOU DID IT! Great!
